

Renewal of accreditation

The Master in Signal Theory and Communications (MSTC) participates in the 2019/20 Accreditation Renewal process managed by the [madri+d Knowledge Foundation](#).

The Master will present in the coming months to the madri+d Knowledge Foundation the self-assessment report required for such renovation, as well as the visit of the panel of experts assigned by the evaluating agency.

The self-assessment report implies an analysis of the degree of compliance with the quality standards established by the regional agency, in line with the national and European regulatory and cultural framework for quality.

As indicated by the madri+d Knowledge Foundation, so that anyone can participate in this process,

- through [this link](#) you can access the self-assessment report of the MSTC, and
- through [this link](#) you can access the “OPEN HEARING FORM”, by means of which any interested person can express their opinion on any aspect related to a specific official title that is being evaluated to renew their accreditation.

The opinions gathered by the madri+d Knowledge Foundation will be made available to the members of the Panel of Experts who carry out the evaluation for the Renewal of the accreditation of each degree, one week before the external visit.

Update

This Master will receive in November 2020 (from Wednesday 4 to Friday 6) the visit of the panel of experts assigned by the Foundation to evaluate it. This panel will interview the different groups related to the degree: Students, Graduates, Teaching and Research Personnel, Administration and Services Personnel, Employers, and so on.
